Lin Ai

Washington, D.C. la987@georgetown.edu Google Scholar linnotlinn.github.io GitHub

Education

MS **Georgetown University**, Computational Linguistics — Sep 2025 – May 2027 (expected)
- GPA: 4.0/4.0

MSt **University of Oxford**, Master of Studies in Linguistics, Philology and Phonetics — Oct 2024 – Jun 2025
- Degree awarded with Merit
- Distinction in Graduate Semantics & Pragmatics

BA **Cornell University**, Bachelor of Arts in Literatures in English, Classics and the College Scholar Program — Sep 2019 – May 2023
- Summa Cum Laude

Research Interests

Computational models and resources for linguistics; Language model evaluation and interpretability.

Publications († indicates equal contribution)

Lin Ai, Emma Thronson, Katherine Conhaim, Amir Zeldes. The Sum of All Summaries: PROPALIGN for Graded Proposition Salience Evaluation. *Under Review*

Kohei Kajikawa†, **Lin Ai**†, Tatsuki Kuribayashi, Ethan Gotlieb Wilcox. Using LMs to Model the Effects of Context and Coreference during Sentence Comprehension. In *Proceedings of the 2026 Conference on Empirical Methods in Natural Language Processing*. — Oct 2026

Lin Ai, Amir Zeldes. DM Doppelgangers: Implicit Connectives as eRST Signals. In *Proceedings of CODI-CRAC 2026* (co-located with ACL 2026). **[Best Paper Award]** — Jul 2026

Research Experience

Research Assistant at Psycholinguistics, Information, and Computation Lab (PICoL) — Washington, D.C.
PI: Ethan Wilcox (Georgetown University) — Mar 2026 – Present

- Designed the EMNLP 2026 paper's counterfactual coreference analysis, showing that obscuring coreference links reduced long-context GPT-2's predictive power for human reading times by 20–40%.
- Built the counterfactual experiment's pipeline using Stanza's coreference parser and an LLM API to create coreference- and singleton-disrupted texts; modified GPT-2 surprisal inference algorithm to score original target words in those contexts.

Research Assistant at Corpus Linguistics Lab (Corpling) — Washington, D.C.
PI: Amir Zeldes (Georgetown University) — Oct 2025 – Present

- Developed and evaluated an algorithm linking implicit connectives to discourse relations, adding 1,003 secondary edges to the GUM corpus.
- Built the PROPALIGN pipeline and ran single-model LLM experiments via API calls, finding stronger agreement with summary-based prompts; contributed to manual proposition-to-summary annotations.

Conference Presentations

Lin Ai, Amir Zeldes. Implicit Connectives Are Also eRST Signals! **Poster** presented at *American Association of Corpus Linguistics (AACL) Conference 2026*, University of Florida, Gainesville, FL. — Apr 2026

Lin Ai. "Still" as a Negation of Negative Events. **Talk** presented at *Linguistics and English Language Postgraduate Conference 2025*, University of Edinburgh, Edinburgh, UK. — Jun 2025

Honors, Awards, and Grants

Best Paper Award, CODI-CRAC 2026 — Jul 2026

CODI-CRAC 2026 Student Travel Grant — Jun 2026

Department of Linguistics Graduate Travel Grant, Georgetown University — May 2026

Robert S. Harrison College Scholar Program, Cornell University — 2021–2023

Summer Language Study Fellowship, Cornell University — 2022

Tanner Dean's Scholars, Cornell University — 2019

Skills

Natural Languages: Mandarin and English (near-native), German (advanced), Japanese and Cantonese (intermediate), French (beginner)

Programming Languages: Python and R

Tools: PyTorch, Hugging Face Transformers, pandas, wandb, Git, LaTeX
